## University of British Columbia STAT 203 - STATISTICAL METHODS Winter 2021/22 Term 1

Description:	Organizing, displaying and summarizing data. Inference based on elementary probability models including estimation and hypothesis testing. Faculty of Science credit will not be given. Credit will be given for only one of STAT 200 and STAT 203.
Prerequisite:	Mathematics 11
Objectives:	Determining the validity of a political, economic, legal or scientific argument calls for the weighing of evidence. Often this evidence consists of data. In this course, you will learn statistical methods for presenting and evaluating data. You will also develop ways of thinking critically about data collection and analysis.
Course instructors:	Eugenia Yu (Department of Statistics) Md. Jahurul Islam (Department of Linguistics)
Lectures:	MWF 1-2pm (in-person in ESB 1012)
Tutorial:	During the weekly tutorial sessions, TA's will discuss pre-assigned problems, lead the class in practical activities. There may be in-class quizzes.
Computer use:	You will need a calculator that can do basic arithmetic, including taking square roots. For activities conducted in the tutorials, we will use R and R Commander (a freeware).
Assessment:	Written assignments (2 assignments, 10%) WeBWorK online assignments (10-11 assignments, 10%) Tutorials (10%) Midterm exams (two in-class exams, 15% each) Final exam (40%)
	Note: There will be no make-up exams.
	Missed final exam policy: Students who miss the final exam must report to their Faculty advising office within 48 hours of the missed exam, and must supply supporting documentation. Only your Faculty Advising office can grant deferred

within 48 hours of the missed exam, and must supply supporting documentation. Only your Faculty Advising office can grant deferred standing in a course. You must also notify your instructor prior to (if possible) or immediately after the exam. Your instructor will let you know when you are expected to write your deferred exam. Deferred exams will ONLY be provided to students who have applied for and received deferred standing from their Faculty.

Teaching method:	assigned reading which students are expected to complete before class. During lecture, the instructor will review concepts, deliver course material and use part of the lecture for in-class activities. Students will be working in groups and solving problems on topics recently covered during in-class activities. Clicker questions will be given along the way to check progress
	and provide feedback to students.

Textbook:Stats: Data and Models by De Veaux et al., 3rd Canadian edition, Pearson<br/>Canada. Copyright 2018.

## Lecture schedule (tentative):

Lecture	Торіс	Chapter
	and understanding data (displays and summaries of categoried data, Normal model)	cal and
1	Introduction; type of variables	1
2	Displaying and summarizing categorical data	2
3	Simpson's Paradox	2
4	Displaying quantitative data	3
5	Summarizing quantitative data	3
6	Understanding and comparing distributions	4
7	Standardization and Normal model	5
8	More on Normal model	5
	relationships between variables, (scatterplots, correlation, re	•
9	Scatterplots, correlation	6
10	Linear regression	7
11	More on linear regression	7
12	Regression wisdom	8
III. Gatherin	g data (sample surveys, experiments)	
13	Population versus sample, parameters versus statistics; sample surveys	9
14	Observational studies versus experiments	10
15	Experimental design	10
IV. Random	ness and probability, central limit theorem	
4.0	less and probability, central limit theorem	
16		11
<u> </u>	Randomness, introduction to probability   Probability rules	<u> </u>
	Randomness, introduction to probabilityProbability rulesConditional probabilities	
17	Randomness, introduction to probability Probability rules	11
17 18 19 20	Randomness, introduction to probabilityProbability rulesConditional probabilities	11 12
17 18 19	Randomness, introduction to probability   Probability rules   Conditional probabilities   Independence of events	11 12 12
17 18 19 20	Randomness, introduction to probability   Probability rules   Conditional probabilities   Independence of events   Sampling distribution for proportions	11 12 12 14
17 18 19 20 21	Randomness, introduction to probability   Probability rules   Conditional probabilities   Independence of events   Sampling distribution for proportions   More on sampling distribution for proportions	11 12 12 12 14 14
17 18 19 20 21 22 23	Randomness, introduction to probability   Probability rules   Conditional probabilities   Independence of events   Sampling distribution for proportions   More on sampling distribution for proportions   Sampling distribution for means   Central Limit Theorem	11 12 12 14 14 14 14
17 18 19 20 21 22 23	Randomness, introduction to probability   Probability rules   Conditional probabilities   Independence of events   Sampling distribution for proportions   More on sampling distribution for proportions   Sampling distribution for means   Central Limit Theorem	11 12 12 14 14 14 14
17 18 19 20 21 22 23 <b>V. One-sam</b>	Randomness, introduction to probability   Probability rules   Conditional probabilities   Independence of events   Sampling distribution for proportions   More on sampling distribution for proportions   Sampling distribution for means   Central Limit Theorem	11 12 12 14 14 14 14 14 14

VI. Inference for means			
29	Confidence intervals for means, t-model	18	
30	Hypothesis testing for means	18	
31	Comparison of two means (two-sample confidence t confidence intervals	19	
32	Comparison of two means (two-sample t-test)	19	
33	Analysis of Variance (if time permits)	24	

## University policies and resources to support student success:

UBC provides resources to support student learning and to maintain healthy lifestyles but recognizes that sometimes crises arise and so there are additional resources to access including those for survivors of sexual violence. UBC values respect for the person and ideas of all members of the academic community. Harassment and discrimination are not tolerated nor is suppression of academic freedom. UBC provides appropriate accommodation for students with disabilities and for religious and cultural observances. UBC values academic honesty and students are expected to acknowledge the ideas generated by others and to uphold the highest academic standards in all of their actions. Details of the policies and how to access support are available at <a href="https://senate.ubc.ca/policies-resources-support-student-success">https://senate.ubc.ca/policies-resources-support-student-support-stu

Related academic policies: <u>Academic Concession</u> <u>Academic Honesty and Standards</u> <u>Attendance</u> <u>Grading Practices</u> <u>Student Conduct and Discipline</u> Viewing Marked Work
